Tectonophysics, 206 (1992) 389–390
Elsevier Science Publishers B.V., Amsterdam

CONTENTS

Tectonophysics Volume 206

Research Papers

High-temperature creep of olivine single crystals, 2. Dislocation structures
Q. Bai (Ithaca, N.Y., USA) and D.L. Kohlstedt (Minneapolis, Minn., USA) 1
Upper mantle peridotites in the Bay of Islands Ophiolite, Newfoundland: formation during the final stages of a spreading centre?
G. Suhr (St. John's, Nfld., Canada) 31
Numerical simulation of Rayleigh-Taylor instability for single and multiple salt diapirs
S. Zaleski and P. Julien (Paris, France) 55
Helium isotopes in Alpine regions
B. Marty (Paris, France), R.K. O'Nions, E.R. Oxburgh and D. Martel (Cambridge, UK) and S. Lombardi (Rome, Italy) .. 71
Seismically induced deformation structures in Oligocene shallow-marine and aeolian coastal sands (Paris Basin)
I. Cojan and M. Thiry (Fontainebleau, France) 79
Tectonic analysis of a flexed foreland: the Ragusa Platform
E. Barrier (Paris, France) 91
Gravity and magnetic constraints on deep and intermediate crustal structure and evolution models for the Rhine Graben
J.O. Campos-Enriquez, P. Hubral, F. Wenzel, E. Lueschen and L. Meier (Karlsruhe, Germany) 113
Depth dependence of seismic attenuation in the Messina Strait area
A. Godano (Napoli, Italy), A. Bottari (Messina, Italy), O. Cocina (Catania, Italy), E.D. Pezzo (Salerno, Italy) and A. Marino (Messina, Italy) 137
The early Palaeozoic of the North Atlantic region as a test case for the use of fossils in continental reconstruction
R.A. Fortey and L.R.M. Cocks (London, UK) 147
The suture between the Alps and Apennines in the Ligurian sector based on geological and geomagnetic data
E. Bozzo, S. Campi, G. Capponi and G. Giglia (Genoa, Italy) 159
Field relationships and geochemistry of pre-collisional (India-Asia) granitoid magmatism in the central Karakoram, northern Pakistan
M.B. Crawford (Leicester, UK) and M.P. Searle (Oxford, UK) 171
Calcite twinning and determination of paleostress orientations: three methods compared
D. Shelley (Christchurch, New Zealand) 193
Deformation of remanent magnetism in a synthetic aggregate with hematite
G.J. Borradaile (Thunder Bay, Ont., Canada) 203
Palaeostresses inferred from macrofractures, Colorado Plateau, western U.S.A.
F. Bergerat, C. Bouroz-Weil and J. Angelier (Paris, France) 219
Morphostructural study and type of volcanism of submarine volcanoes over the Pitcairn hot spot in the South Pacific
N. Binard and R. Hékinian (Plouzané, France), and P. Stoffers (Kiel, Germany) 245
Mesoscopic faults in the granite of Isola del Giglio (Tuscan Archipelago)
P. Passerini and M. Marcucci (Florence, Italy) 265
A. Kinematic analysis incorporating incremental strain data for the Frontal Pennine Zones of the western French Alps
S. Spencer (Newcastle upon Tyne, UK) 285
Evidence for the existence of a paleosubduction zone beneath the Rhodopean massif (Central Balkans)
S. Shanov, E. Spassov and T. Georgiev (Sofia, Bulgaria) 307
Paleomagnetism of Jurassic sediments as evidence for oroclinal bending of the Inner West Carpathians
J. Kruczyk, M. Kądziałko-Hofmokl and J. Lefeld (Warsaw, Poland), P. Pagač and I. Tunyi (Bratislava, Czechoslovakia) 315
Density structure of the Mariana Arc and its vicinity obtained from successive inversion of the gravity anomaly
C.S. Yang, J. Segawa and Y. Fukuda (Tokyo, Japan) 325
Bombay gravity high and eruption of Deccan flood basalts (India) from a shallow secondary plume
J.G. Negi, P.K. Agrawal, A.P. Singh and O.P. Pandey (Hyderabad, India) 341
An analysis of the gravity field and tectonic evaluation of the northwestern part of Bangladesh
A.A. Khan (Rajshahi, Bangladesh) and T.Rahman (Fantoft, Norway) 351

Modelling of the gravity effects of flexurally compensating thin layers under the Afanasy-Nikitin seamount
J. Paul and R.N. Singh (Hyderabad, India) 365
Experimental insights into the partitioning of motion within zones of oblique subduction
N. Pinet (Valbonne, France) and P.R. Cobbold (Rennes, France) 371
